

Haris Ali Khan

Software Engineer (Full-Stack & Frontend Architecture)

Dubai, United Arab Emirates • +971567296739 • thehariskhan7@gmail.com

[Portfolio](#) | [LinkedIn](#) | [Github](#) | [Medium](#)

Software Engineer with 4 years of experience designing, optimizing, and scaling high-performance web applications across enterprise, SaaS, and logistics sectors. Specialized in modern frontend architectures (SSR, Micro Frontends, and complex UI component systems) with a proven track record of bridging the gap to backend infrastructures using NestJS and .NET Core. Strong focus on runtime performance optimization, system scalability, and CI/CD delivery pipelines.

Core Technical Skills

- **Frontend Architecture:** React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Redux Toolkit, TailwindCSS, SSR/CSR
- **Backend & APIs:** Node.js, NestJS, ASP.NET Core, RESTful APIs, JWT Authentication
- **Engineering & DevOps:** System Design Patterns, Micro Frontend Architecture, Performance Optimization (Lazy Loading, Code Splitting, Core Web Vitals), Docker, Azure DevOps, Git
- **Databases & CMS:** PostgreSQL, MongoDB, MySQL, WordPress (Custom Plugins/Integrations)

WORK EXPERIENCE

7X- Emirates Post Group

Software Engineer

Dubai, UAE

Oct 2024 - Present

- **Engineered the flagship customer-facing EMX Shipments web platform**, scaling frontend architecture to support tracking, booking, and dynamic rescheduling for a national user base processing **100K+ monthly courier shipments**.
- **Optimized high-traffic scheduling workflows and complex UI states**, eliminating multi-step form friction and ensuring zero-latency real-time validation during critical booking modification flows.
- **Onboarded shipments module onto Micro Frontend architecture** using Module Federation, enabling independent deployment across logistics teams.
- **Engineered a shared, reusable UI component system** using React and TypeScript, cutting development cycles across multiple inbound and outbound logistics modules
- **Integrated enterprise-grade .NET Core REST APIs** and managed automated frontend delivery pipelines within Azure DevOps to ensure rapid, highly optimized CI/CD workflows.

Anax Holding LLC

Software Engineer (Frontend & CMS)

Dubai, UAE

Dec 2023 - Oct 2024

- **Developed high-performance luxury real estate web applications** targeting thousands of high-net-worth investors and active property buyers across Dubai and the GCC region.
- **Conducted performance audits and implemented structural caching**, asset optimization, and lazy loading to maintain rapid PageSpeed scores for high-traffic launch campaigns.
- **Designed internal CRM dashboards, lead-capture workflows, and custom WordPress/PHP architectures** to smoothly align corporate brand assets with modern frontend modules.

Healthcare & Digital Solutions Agencies (Contract - Remote)

Contract Software Engineer | Remote

Feb 2023 - Dec 2023

- **Engineered responsive MERN stack applications** as an independent contractor, managing full-lifecycle feature development and cross-browser optimizations for international client agencies.
- **Developed core modules for Attendance and Healthcare Management platforms** using React.js, designing secure, authenticated REST API integrations.
- **Improved Lighthouse/PageSpeed scores** from **red (<50)** to **green (90+)** via image optimization, LCP prioritization, and critical CSS inlining.
- **Built and maintained reusable frontend component systems**, ensuring design system consistency and faster feature shipping speeds across diverse project codebases.

WPBrigade

Frontend Developer Internship

Sialkot, Pakistan

July 2021 - Oct 2021

- **Executed high-fidelity PSD/Figma/XD design conversions** into highly responsive WordPress websites.
- **Developed custom Elementor themes** and asset-optimization strategies to boost runtime performance.
- **Resolved cross-browser compatibility anomalies** and collaborated on frontend QA debugging workflows.

PROJECTS

- **Jurist Council AI:** Built a multi-agent legal simulation using CrewAI and a local LLM (Ollama), with a context-management layer to keep prompts within the local model's practical limits.
- **SeparateOut:** Developed a full-stack content generation web application integrating React 19 with Gemini 2.0 and Imagen 3 APIs.
- **PeekLocal:** Built a developer-focused Chrome extension for real-time live-editing and monitoring of local and session storage.

EDUCATION

- **Bachelor's in Information Technology – 2022** | University of Gujrat, Punjab, Pakistan

CERTIFICATIONS

- **Mastering Software Architecture Patterns and System Design** - Udemy (2026)
- **Google – Introduction to Generative AI** (2024)
- **Web3 Professional** – MTF Institute via Udemy (2023)
- **SEO for Beginners** – Daragh Walsh (2019)
